--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

Art Unit: 2711

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Kenmochi et al. (5,9000,947).

As to claims 1 and 2, the system of Kenmochi et al clearly contains all of the claimed subject matter. The "camera module" is met by either Reading unit 1-5 shown in figure 1 or the camera shown in figure 18. The "computer ... receiving unit" and the "transmitter/receiver module" is met jointly by CPU 1-1, Image Processing Apparatus 1-15, Operation Unit 104, Modem 1-8 and other related elements. In summary, the system of Kenmochi et al. takes an image from a camera and converts it into the appropriate type of facsimile transmission.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kenmochi et al.

As to claim 3, Kenmochi et al teach the use of color facsimile but do not specify the use of Group IV facsimile. The Examiner takes Official notice that Group IV facsimile is an old and well

known standard in the art. It would have been blatantly obvious to one of ordinary skill in the art to use Group IV facsimile with the system of Kenmochi et al because it would allow the system to conform to known standards.
